LIVER FUNCTION TESTS (LFT) INFORMATION SHEET

GENERAL

The "Liver Function Tests" (LFT) are a group of tests which measure a range of different activities of the liver as well as some other organs. At SydPath the tests included in the LFT profile include the following: Total Protein, Albumin, Total Bilirubin, ALT, AST, GGT and ALP. Further information concerning these tests can be found on the following pages:

Total Protein
Albumin
Bilirubin
AST
ALT
GGT
ALP

In additional there are a range of other tests which may provide important information about the function of the liver. These include prothrombin time, lactate dehydrogenase, conjugated bilirubin. These tests are not part of the "LFT" and must be requested separately.
